Congratulations on graduating as an Architect from Top Gun Academy, Vadivel!

You have made good inroads into your journey to architecting solutions. We hope to see you continue to focus on your quest and continue learning and evolving in the areas of complex solution architecture. We hope you also get to implement the learnings from the course and we value your contribution and collaboration with your peers.
We wish you all the best!

THINKING AS AN ARCHITECT

It is nice to see your hardwork and dedication work to become a full lifecycle architect. Continue to focus on developing the craft - and don't shy away from thinking out of the box.

B

TECHNICAL CONFIDENCE

You have a decent command over new tools and concepts that you have learnt during the program. It was nice to see how you absorbed most of the technologies that you were taught during the program. We would strongly advise you to go through the video tutorials of the sessions to get a deeper understanding.

B

SESSION ENGAGEMENT

Your engagement level in the sessions was high. This not only helped ensure that session was interactive but also resolve a lot of queries for other team members as well.

A

SESSION ASSIGNMENTS

You managed to successfully complete all your assignments, whilst being on other project engagements. Keep up the good work.

A

FINAL ASSIGNMENT

We are happy to see that you have strong skills and abstract well, however tend to be traditional and perhaps conservative in approach though you need not be. Your communication skills are commendable. Keep learning and evolving.
